SUMMARY

Result-oriented project team leader with experience covering software related project and product development. A passionate and optimistic individual, I am progress driven and eager to learn new things to help meet business goals.

PROFESSIONAL EXPERIENCE

Software Developer – Summer Intern

[Ventera](#) 5/2022 – 8/2022 Reston, VA

- Used agile methodologies to plan, design, develop, and present a complex intern web application from start to finish.
- Developed the majority of the front end while gaining significant hands-on experience with Node, MySQL, and Angular

Software Developer – Summer Intern

[Sequoia](#) 5/2022 – 8/2022 Reston, VA

- Contributed to the development of a full life cycle web application designed to improve contract management
- Developed a secure landing and login page with Angular that manages and authenticates user account information

Software Developer – Winter Intern

[TrEd Solutions](#) 12/2021 – 1/2022 Manassas, VA

- Conducted Research on digital marketing industry and demand side platform (DSP) APIs
- Contributed to AdTech campaign by modifying existing shell script files to use with alternate demand side platforms
- Applied CRUD API calls to implement an updated program for company's software related needs

Java Programming Instructor

[AIGO Learning](#) 6/2021 – 1/2022 Virtual

- Taught fundamentals of decision structures, Booleans, loops, iterators, exceptions, errors, arrays, & array lists
- Fostered a welcoming and productive classroom environment by keeping students mentally engaged and physically motivated

PROJECTS

Social Media Management Software

[Angular \(SaaS\) Website](#)

- Used advanced research, problem solving, entrepreneurial, and web development skills to create my very own multi-framework SaaS product from the ground up.

To the Moon, Storm the Castle

[Java Games](#)

- Used graphic design, interactive algorithms, and multiple action listeners to create the games named above.
