Software design and development in multiple platforms and languages including Java, MatLab, Python, and more.

General engineering aptitude, knowledge, and experience.

Excellent soft skills and team leadership skills.

Chipotle / Service Manager
December 2017 - Present

With my time at Chipotle I have learned many skills which help me to work well with my team and customers, as well as technical skills like inventory management and general equipment repairs.

RD Martin Construction / Assistant
June 2015 - November 2017

At RD Martin Construction I was tasked with assisting many general contracting jobs. I learned many handy skills ranging from drywall work to tile and stone to framing and roofing.

Virginia Polytechnic Institute & State University / Bachelor's Degree of Computer Science with a Minor of Mathematics
Graduation Fall 2023

Transferring from Virginia Western after graduating with my Associates degree, I have found my home here at Virginia Tech. I participate in many projects and software development courses which have strengthened my programming skills. I have also completed the required courses to earn my mathematics minor.

Virginia Western Community College / Associate's Degree of Engineering with a Specialization of Computer Science
Graduated Spring 2021

From humble beginnings in Roanoke Virginia, I worked hard to earn my Associates degree while also working full time, developing both my time management skills as well as my first introduction into programming, engineering, and mathematics.

Graduated Magna Cum laude from VWCC
